

Press Release 15.6.10

## AaE International introduces new technology to assist forwarding customers

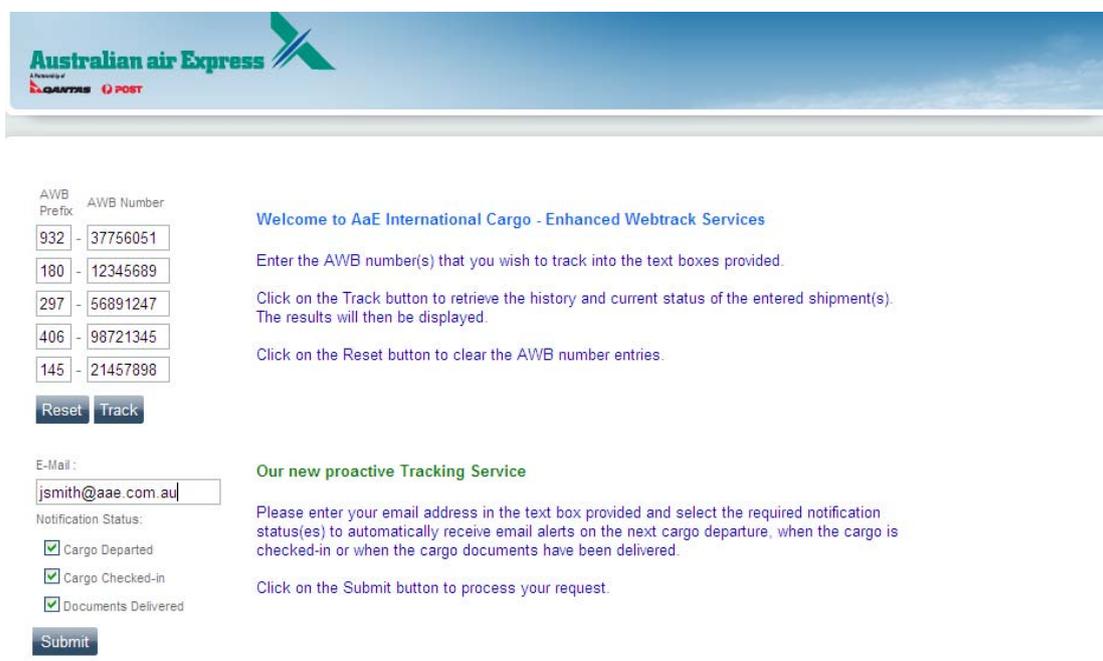

Australian Air Express (AaE) International has recently launched an enhanced version of their Webtrack services, available via [www.aae.com.au/services/international](http://www.aae.com.au/services/international)

This latest release of AaE Webtrack takes the service to a new level and offers a unique benefit to the customers of AaE's cargo handling airlines in Australia through a new pro-active shipment tracking service for export and imports.

Customers now have the ability to enter their air waybill number(s) into AaE Webtrack and receive automatic status updates on their shipment via email, 24/7.

Up to 5 different air waybills can be submitted at any one time, with the customer able to specify the email address they would like the updates sent to.

AaE Webtrack allows the customer to choose which specific status alerts they would like to receive, as their cargo departs, is checked in, or when documents are available at destination.

The screenshot shows the AaE International Cargo - Enhanced Webtrack Services web interface. At the top, there is a header with the Australian Air Express logo and the text "AaE International Cargo - Enhanced Webtrack Services". Below the header, there is a form with two main sections. The first section is for tracking shipments, with a heading "Welcome to AaE International Cargo - Enhanced Webtrack Services". It contains a table for entering AWB numbers, a "Track" button, and instructions. The second section is for email notifications, with a heading "Our new proactive Tracking Service". It contains an "E-Mail" field, a "Notification Status" section with three checked options, and a "Submit" button.

AWB Prefix	AWB Number
932	37756051
180	12345689
297	56891247
406	98721345
145	21457898

E-Mail:

Notification Status:

- Cargo Departed
- Cargo Checked-in
- Documents Delivered

Robert Brown, General Manager International at AaE commented "We're delighted to bring this latest innovation to our customers. This new service provides a fast and efficient way for our freight forwarding customers to be

automatically notified when their import cargo and documents are available for collection, as well as when export cargo has departed

.  
At AaE, we clearly recognise how critical technology is to improving the efficiency of the international air cargo industry and integrated with our commitment to Cargo 2000 and transparency of performance throughout Australia.”
